

**BEINGFI**

—Global Crypto Digital Bank—

Project Overview V2.0

# —Project Highlights—

## Cross-Disciplinary Team

10+ years in traditional internet and 5+ years in crypto.

Developed top-10 mobile games in China and payment platforms with daily transactions over 100 million

90% of the product is developed, ready to launch in 2 months

## Clear Market Entry Point

Initial targets: Philippines' Jiuding App and Cambodia's Huiwang App, with combined deposits over \$30 billion.

Jiuding offers deposit and exchange in the Philippines but relies on the Solaire Casino membership system, lacking financial licenses.。

Huiwang, developed by local money houses, holds market share in Cambodia but has limited crypto support.

## Investment for Kiribati Citizenship

Partnering with the Kiribati government to offer unique financial and identity enhancement services,

allowing users to obtain passports and citizenship through token staking.

# —Project Overview—

## About BeingFi

BeingFi is a global crypto digital banking platform that offers comprehensive fiat and crypto asset management, cross-border payments, and diverse financial services for individuals and businesses. We bridge the Web2 and Web3 worlds, targeting the underbanked crypto market. Our services include wallet management for crypto and fiat, crypto purchases and trading, global payment solutions, asset management, and issuing VISA and MasterCard credit cards.

# —Web3.0 & Web2.0—

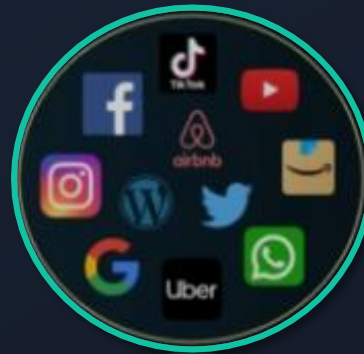

## Web1.0

1990

Portal & Search Engine  
Users are just readers.  
Businesses operate  
independently.

## Web2.0

2004

Social Media & Social Websites  
Users are both readers & creators  
Creators & businesses share  
governance.

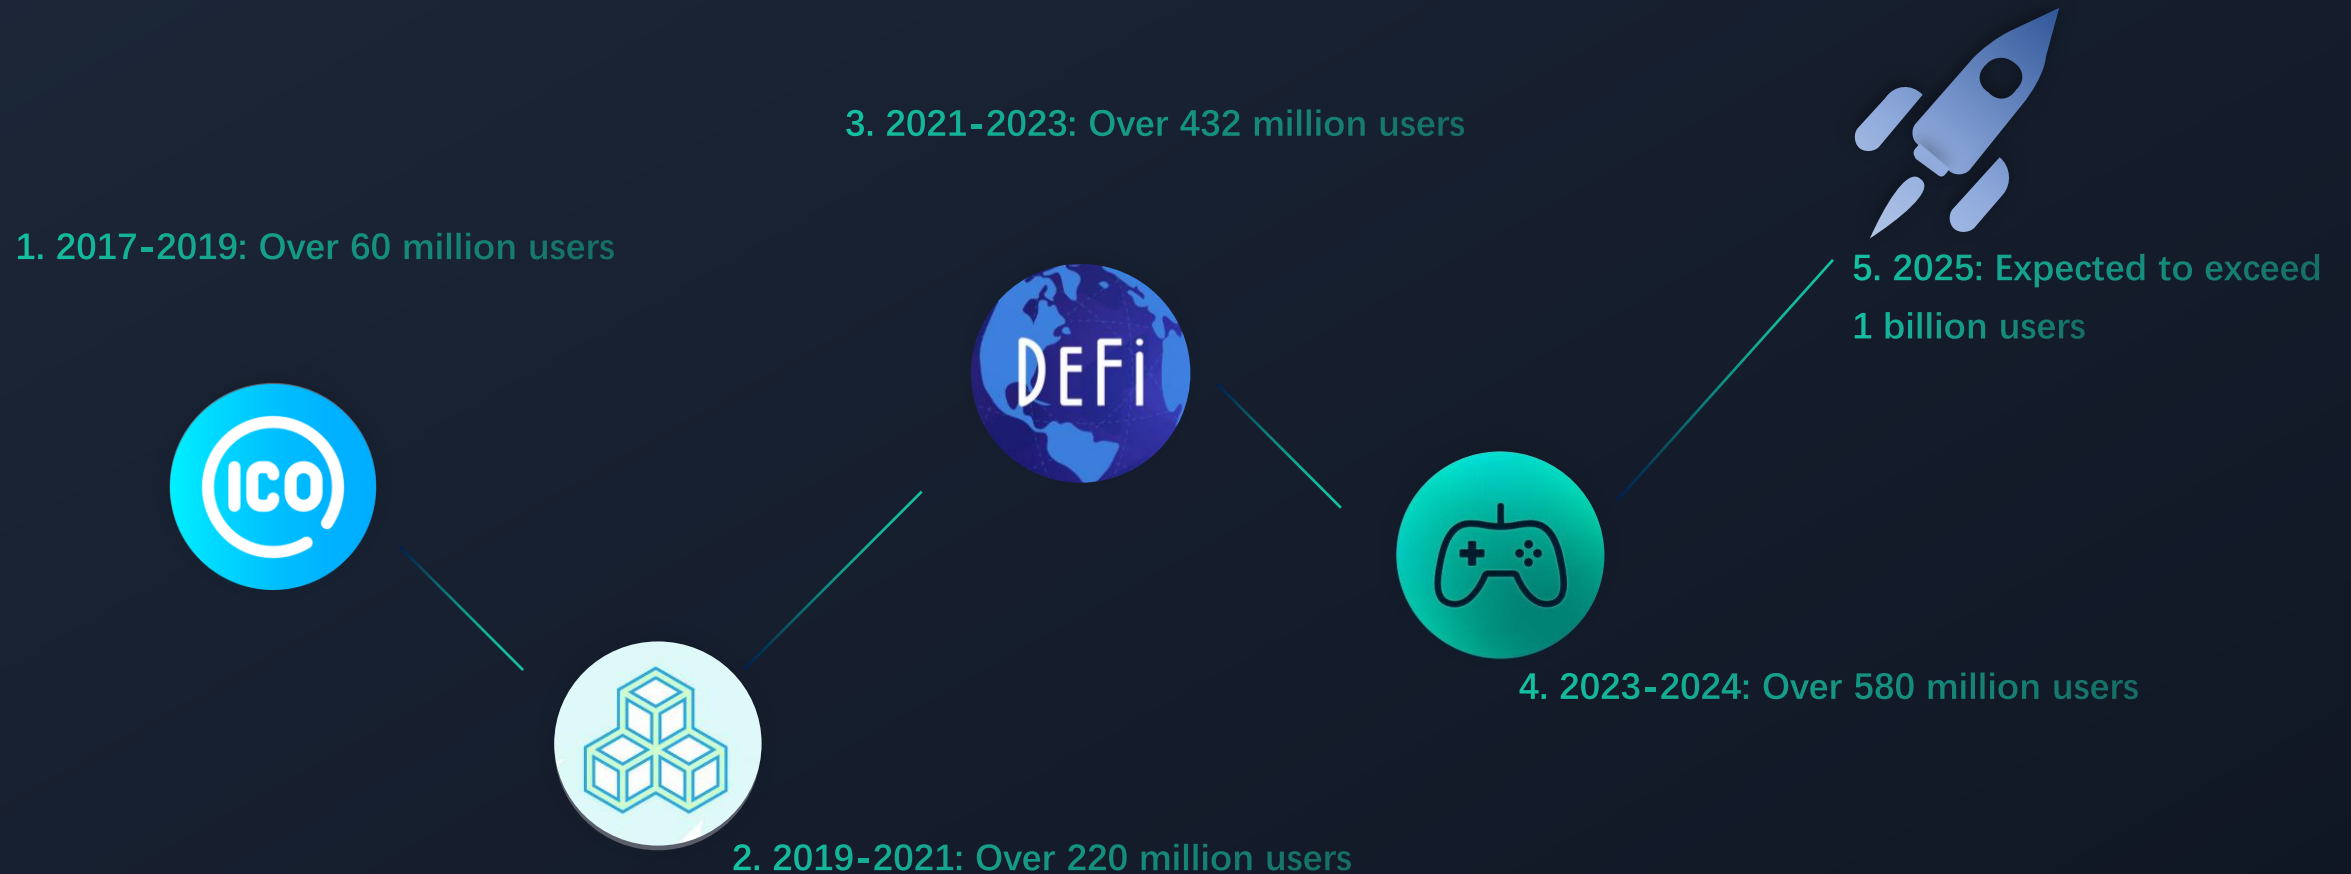

## Web3.0

2021

NFT, GameFi, Metaverse  
Users are also owners.  
Governed by decentralized  
autonomous organizations.

# —Future Trends in the Crypto Market—

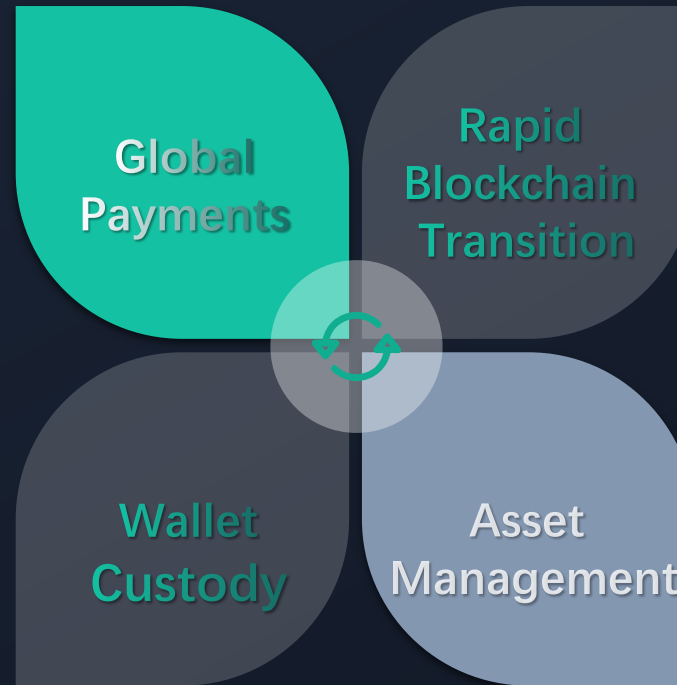

# —BeingFi B2B Business—

## Over 50 Global Fiat Payment APIs

Integrated Top 20 fiat purchase channels, 50+ fiat payment gateways , Built-in OTC trading section , Coverage of 100+ major fiat currencies worldwide.

## Supports 100+ Major Crypto Assets

Supports deposits and withdrawals for over 100 major cryptocurrencies and 50 prominent NFTs, using cold and hot wallet separation technology. Provides comprehensive crypto asset collection, payment, and storage services for clients.

## Quickly integrate the SDK for blockchain transition.

Traditional Web2 applications can quickly access all Web 3.0 features by integrating BeingFi's front-end SDK, facilitating an easy transition to blockchain applications while remaining compatible with Web2 users.

## Faster & Safer Asset Management

Helps merchants manage and grow their assets more effectively, with secure transaction processes and strategies provided by third-party banking-grade institutions.

# —BeingFi B2C Business—

Compatible with both **Web3.0** & **Web2.0** users , breaking down barriers between global fiat & cryptocurrencies.

## VISA MATSER Global Web3 Credit Cards

Issuing Web3 virtual and physical cards globally, supported by secure fund, risk control, and settlement systems.

## Supports both fiat and cryptocurrencies

enabling deposits and withdrawals for over 100 major cryptocurrencies and 50 prominent NFTs. Additionally, it offers payment services for over 50 global fiat currencies.

## Facilitating easier conversions between crypto and fiat assets

we offer compliant OTC services with a low cost of 0.2% for fiat exchange. Channels include MOONPAY, REAP, and various Asian digital banks.

## Compatible with Web3 and Web2

integrating 15+ decentralized wallets. Users can seamlessly transfer assets between Web3 and Web2 wallets, with access to a full suite of Web3 features, including Swap, DeFi, and NFT trading.
